SCOFIELD® Liquid Release BG

Bubblegum Scented Release

1. Description:

Scofield Liquid Release BG is a low-cost bubble gum scented release and bond breaker for use in the concrete stamping process. Application of Liquid Release BG to the concrete surface and stamps prior to stamping will prevent the transfer of the wet paste to the stamping mat. It may also be applied to tools to prevent them from marring patterns in fresh concrete and may be used when stamping or texturing cementitious overlays. Liquid Release BG will not damage integrally colored concrete and is suitable for use with most color hardeners. It will evaporate completely, leaving no residue, and will not interfere with the application of solvent-borne sealers. Liquid Release BG is not intended for use as a bond breaker for tilt-up construction.

2. Product Benefits:

- Pleasant scent
- Economical
- Easy to use
- Easy clean up of stamp

3. Areas of Application: Apply over fresh concrete or overlays that will be imprinted with stamping tools.

4. Coverage: Concrete Surface: 200 ft²per gallon. Stamps and Tools: 400 ft²per gallon.

5. Surface Prep: Tool surfaces should be clean and dry before applying SCOFIELD®Liquid Release BG. For best results, remove any dirt, rust, scale or concrete before application. Tools that have been previously treated with a neutral form release should be cleaned with detergent and warm water, then thoroughly rinsed and dried before using Scofield Liquid Release BG. Wait until the concrete surface is firm enough to support a persons weight, then apply Scofield Liquid Release BG and proceed to stamp.

6. Application: Scofield Liquid Release BG should be applied to the concrete surface and the clean imprinting tool with a pump up sprayer, immediately prior to imprinting. An even, light application to both surfaces should be sufficient to prevent the transfer of paste. Since the material evaporates, it is necessary to minimize the time between application of the release material and the imprinting process. Mats and tools will need to be periodically re-sprayed. The evaporation rate of Scofield Liquid Release BG is affected by wind, humidity, and temperature. Avoid applying excessive amounts of the material, as this may cause defects in the concrete surface. If excess material is applied, allow to evaporate. Product leaves no residue.

7. Precaution: Combustible liquid. Do not use near open flames or ignition sources.

8. Shelf Life: 1 year in original, unopened container.

9. Storage: Do not store at temperatures below 32 degrees F (0 degrees C).

10. Technical Data

VOC: 0 g/L w/exempt solvent
Flash Point: 135° F

HMIS

Health: *3 Flammability: 2
Reactivity: 0 Protection: X
