

SCOFIELD® REVIVE™ SEALER & SCOFIELD® REVIVE-VOC™ SEALER

SCOFIELD Revive Sealer and SCOFIELD Revive-VOC Sealer are solvent-borne, color-matched, durable curing compounds and sealers developed to improve the color uniformity of concrete surfaces.

SCOFIELD Revive improves the appearance of concrete flatwork where there may be color imperfections caused during application or by wear and tear.

Colors:

- Available in 24 standard CHROMIX® Admixtures colors - see color chart A-312
- Also available in Concrete Gray and Black

Packaging:

- Base Units - 4 gallon pail.
- Tint - 1 gallon container (contains 7 pints).

Coverage:

- 300 - 500 sq. ft./ gallon, per coat.
- One coat is usually sufficient - two may be required, depending on porosity and appearance.

Ideal Uses:

- To improve the appearance of interior or exterior colored concrete flatwork.
- To improve the appearance of flatwork where there may be imperfections due to application or wear and tear.
- As a curing compound for freshly placed colored concrete.

Application:

- See appropriate Tech-Data Bulletin B-624 or B-634 for full details.
- Mix with a paint stick suitable for a 5 gallon container - **DO NOT MIX WITH DRILL OR OTHER POWER TOOLS.**
- Apply with a roller - generally a 1/4" nap.
Do not apply with a sprayer of any kind.

Keys to success:

- Perform a mockup to verify customer expectations.
- Apply when concrete surface temperatures are between 50 and 80 degrees - use an infrared digital thermometer.
- Apply when temperatures are dropping, as the material may develop surface air voids in rapidly rising temperatures.
- Carefully follow coverage rate guidelines; over-application may result in bubbling.

SCOFIELD® REVIVE™ SEALER & SCOFIELD® REVIVE-VOC™ SEALER

Maintenance

- Reapply SCOFIELD Revive Sealer or SCOFIELD Revive-VOC Sealer periodically as the sealer is worn off the surface.
- SCOFIELD Revive may also be top coated with SCOFIELD® Cureseal-S™ Gloss or Matte.
- SCOFIELD Revive-VOC may be top coated with SCOFIELD® Cureseal-VOC™ Gloss or Matte.

Has excellent curing properties and moisture retention.

Helps protect against staining.

Is resistant to abrasion, freeze-thaw cycles, deicing salts and many chemicals.

Will not blush or turn yellow with age.

Is easy to clean and maintain.
