

LITHOCHROME® Color Hardener

Powdered Concrete Color

Contractor Sheet

LITHOCHROME Color Hardener produces an extremely hard and durable surface that will hold up under the most demanding conditions. Tested superior in compressive strength, abrasion resistance and color opacity over other brands. LITHOCHROME Color Hardener also creates a rich paste that provides better definition for stamping or imprinting patterns into concrete.

Colors:

- 24 standard colors. See color selection chart LITHOCHROME Color Hardener A-132.
- Custom colors can be ordered.

Packaging:

- 50 lb. bags and pails
- 10 lb. pails

Recommended application rates:

- Residential projects: Two applications which total 50 lbs/100 ft². One package.
- Commercial projects: Two to three applications which total 90 lbs/100 ft².
- Light colors require: Two to three applications which total 90-120 lbs/100 ft².
- Heavy duty uses require: Three applications which total 120 lbs/100 ft².

Ideal uses:

- In conjunction with imprinted concrete.
- When a lighter or brighter concrete color is desired.
- When a bold color is desired.
- On interior new concrete when a more monochromatic appearance is desired.
- Cannot be used over cementitious toppings.

Application:

- Determine the amount of material needed.
- Broadcast material onto the surface by hand or with a mechanical spreader.
- Floating should be done with wod floats so that the surface remains open and the material gets fully worked in.

LITHOCHROME® Color Hardener

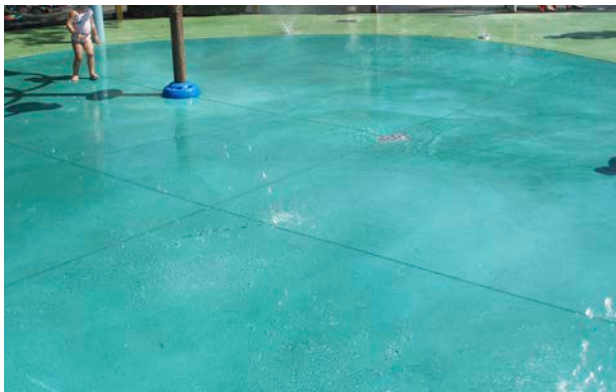

Powdered Concrete Color

Keys to success:

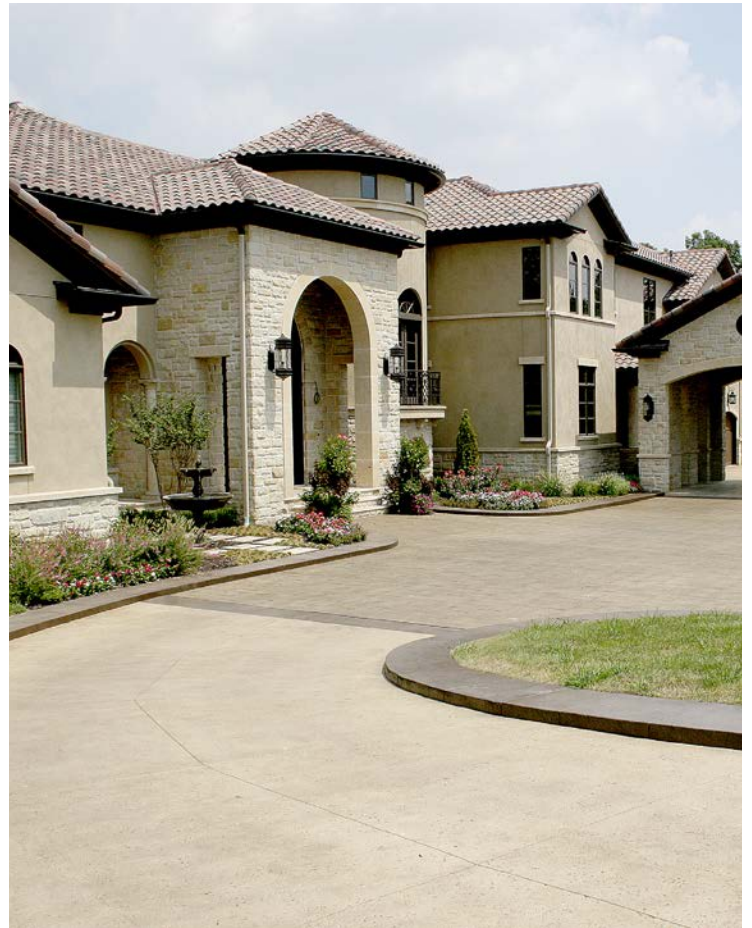

- Use proper dosage rate.
- Broadcast evenly onto the surface.
- Work in with wood bull float.
- Use more finishers than you would on regular gray concrete.

Curing, sealing and maintenance:

- For best results use high quality curing compounds such as:
- LITHOCHROME® Colorwax™
- COLORCURE® Concrete Sealer
- SCOFIELD® Cureseal-W™

Prior to beginning the job, consult the appropriate Scofield Tech-Data Bulletin for LITHOCHROME Color Hardener TD-1110.
